

Quality Technician

Duramax Marine LLC, a 100% Employee-Owned manufacturing company located in Hiram, Ohio is seeking a **Quality Technician** to join our team. Duramax Marine is a long-time, dedicated member of the marine industry. Our products are engineered to increase vessel performance to meet the demands of an ever-changing industry.

We are seeking an enthusiastic, quality-focused **Quality Technician** to join our team of employee owners. The Quality Control Technician role involves being an integral part of the quality management team, collaborating with the Quality Assurance Specialist to ensure the highest standards of product quality and compliance with ISO 9001:2015 regulations. Reporting directly to the Quality Manager, responsibilities include conducting detailed inspections, tests, and analyses of components to verify adherence to quality specifications and standards. **This is a day shift position, Monday through Friday 8am to 4:30pm.**

Roles & Responsibilities:

- **Quality Inspections:** Perform visual inspections and dimensional measurements of components to ensure compliance with quality specifications and standards, identifying any deviations or non-conformities and documenting them accurately.
- **Testing and Analysis:** Conduct various tests and analyses, such as hardness testing, tensile testing, and chemical analysis, to evaluate material properties and product performance, recording test results and observations meticulously.
- **Document Control:** Maintain detailed records of inspection and test results, ensuring that all documentation is complete, accurate, and easily accessible for review by the Quality Manager and other stakeholders.
- **Calibration and Maintenance:** Ensure that inspection and testing equipment is properly calibrated and maintained according to established procedures and schedules, performing routine maintenance and troubleshooting as needed.
- **Quality Audits:** Assist in conducting internal audits to assess compliance with quality management systems, procedures, and regulatory requirements, participating in audit activities and providing input as necessary.
- **Root Cause Analysis:** Collaborate with the Quality Manager and Quality Assurance Specialist to investigate quality issues and non-conformities, identifying root causes and contributing factors and recommending corrective and preventive actions.
- **Continuous Improvement:** Actively participate in quality improvement initiatives and projects, providing feedback and suggestions for process optimization and efficiency gains based on your observations and experiences.
- **Safety and Compliance:** Adhere to all safety protocols and procedures to ensure a safe working environment for yourself and your colleagues, complying with all relevant regulations, standards, and industry best practices related to quality and safety.

FORWARD TOGETHER.

17990 Great Lakes Pkwy, Hiram, OH 44234

Qualifications:

- High school diploma or equivalent required; additional technical education or certification in quality assurance or a related field preferred.
- A minimum of 1-3 years previous experience in a quality control or quality assurance role within a manufacturing environment preferred.
- Experience working with rubber, brass and steel preferred.
- Familiarity with quality management systems and principles, including ISO 9001:2015 standards.
- Ability to use calipers, micrometers, tape measures & other measurement equipment as required, mechanical or digital
- Strong attention to detail and accuracy in performing inspections, tests, and measurements.
- Excellent communication skills, with the ability to effectively communicate findings and recommendations to colleagues and stakeholders.
- Ability to work independently with minimal supervision and as part of a team, collaborating effectively with peers and supervisors to achieve common goals.
- Proficiency in using inspection and testing equipment, tools, and software applications relevant to quality control activities.
